

Dragontail Systems partners with North American payment solution provider

08:21 17 Oct 2017

The system fully automates and streamlines the kitchen flow.

Technology for the quick service restaurant (QSR) industry

Dragontail Systems Ltd (ASX:DTS) has signed an agreement with DELIVER Plus to provide a full featured point of sale (POS) system for quick service and pizza restaurants in the U.S.

Dragontail is a technology provider for the quick service restaurant (QSR) industry with its Algo System and the QT quality system that uses artificial intelligence.

The company's recently signed customer, Georgio's Oven Fresh Pizza Co, has already launched the first combined DELIVER Plus / Dragontail system to its 50 stores.

DELIVER Plus POS systems are installed in more than 11% of the Pizza Hut locations in North America as well as numerous regional chains and 'mom-and-pop' pizza shops.

Dragontail's Algo System uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery.

The system fully automates and streamlines the kitchen flow to deliver an immediate return on investment for fast food and quick service restaurants.

Dragontail's QT system's sensors and cameras automatically monitor the preparation and cooking process in the kitchen to improve the quality and consistency of meals.

The combination of platforms shall provide the QSR segment with a total solution that delivers operating and efficiency advantages.

The U.S. represents a significant market opportunity for Dragontail, with more than 240,000 QSRs and over 620,000 restaurants.
