

Dragontail Systems Demonstrates Algo System to Australian Minister

December 28, 2016: [Dragontail Systems](#) recently demonstrated its innovative technology to the Victorian Minister for Small Business, Innovation and Trade at the store of one of its clients in Ramat Aviv in Tel Aviv during a recent visit to Israel by the minister.

During his visit, Minister Philip Dalidakis and a small delegation were shown how a Pizza Hut store in Ramat Aviv has been making use of Dragontail Systems' Algo dispatching system, which assists in managing the store's kitchen, dispatching and delivery of pizza, and providing the store's customers with the ability to see where their order is as it is being delivered to them.

After implementing Dragontail Systems' Algo dispatching system, the Pizza Hut store in Ramat Aviv improved its delivery times, increased the quality of its food, reduced labour costs, and increased overall customer satisfaction, said Dragontail Systems director of operations, Itzik Bachar, who met with the minister while he was in Israel.

Mr Bachar spoke to the minister on November 16 at the store in Israel about Dragontail Systems' listing on the Australian Securities Exchange and its plan to open an office in Australia following the listing, with its sights currently set on Melbourne, Victoria's capital city.

About Dragontail Systems

Dragontail is revolutionising the Quick Service Restaurant (QSR) industry with its Algo System, which uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery.

The Algo is the first system in the world to fully automate and streamline the kitchen flow to deliver an immediate and significant return on investment to fast food and quick service restaurants. The Algo is setting the standard for the global industry with several chains, such as Pizza Hut in North America and Israel, already using the system.
