

Dragontail Systems Partners with VisionMAX a Leading Digital Ordering Platform in North America

18 January 2018 (Melbourne): **Dragontail Systems Limited** (ASX: DTS) is pleased to announce that it is partnering with Visionmax Solutions Inc. (VisionMAX), a leading digital ordering platform in North America.

VisionMAX offers a wide range of cloud-hosted browser-based solutions that work across all IT infrastructure and manage amongst other things, Point of Sale (POS) and mobile / online ordering. Some of VisionMAX's current enterprise clients include Pizza Pizza, Swiss Chalet, East Side Mario's, Montana's, Harvey's, Sears, and many more.

This partnership further strengthens Dragontail Systems' channel strategy, particularly into the North American market. The Mutual Referral Agreement signed by Dragontail Systems and VisionMAX is expected to expand the customer base of both companies and create new business opportunities by providing access to new customers, key being the ability to offer an integrated solution of both companies' leading technology platforms.

Commenting on the new partnership, VisionMAX President David McDougall said: "In today's competitive retail market, VisionMAX allows its customers to harness technology and function more efficiently and effectively, and in a more innovative and smarter way. Our partnership with Dragontail Systems will enhance these capabilities, and I am sure that both partners will benefit greatly from our partnership as our customers will benefit from an even more efficient operation and improvement of processes in their businesses."

Ido Levanon, Dragontail Systems' CEO said: "This partnership with VisionMAX will strengthen Dragontail Systems' position in the US market. One of our core growth strategies is to expand our channels to market through various collaborations and partnerships. By doing this, we increase the exposure of the Algo platform across broader client sets. The Algo platform has made significant changes to every business that has adopted it to date, including optimising processes, saving resources, increasing customer satisfaction, and much more. I am confident that our partnership with VisionMAX will allow new customers to benefit from the same benefits our existing customers already enjoy."

About Dragontail Systems

Dragontail is revolutionising the Quick Service Restaurant (QSR) industry with its 'Algo' system and computer-vision QT quality system that uses artificial intelligence (AI) machine learning.

The 'Algo' system uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery. It is the first system in the world to fully automate and streamline the kitchen flow to deliver an immediate and significant return on investment to fast food and quick service restaurants.

The QT system's sensor and camera automatically monitor the preparation and cooking process in the kitchen to improve the quality and consistency of meals. Using proprietary advanced AI machine-learning technology, the system keeps improving its diagnostics, becoming even more efficient.
