## **DRAGONTAIL ENTERS ANOTHER EUROPEAN MARKET GOING LIVE IN PH'S STORES ACROSS BELGIUM**

### **Highlights**

- **A nationwide rollout of the Algo platform into over 100 Pizza Hut stores across Belgium will be taking place during Q2-Q3/20.**
- **This win reflects the momentum the Company has on the European continent, following the successful deployment of the Algo across Pizza Hut stores in the UK.**

10 March 2020 (Australia): Dragontail Systems Limited (ASX: DTS, the “Company” or “Dragontail”) is pleased to announce that its Algo Platform will be installed in all Pizza Hut stores across Belgium. The rollout in over 100 stores is expected to take place during Q2-Q3/2020.

The Belgian market is the third European Pizza Hut market that has selected the Algo as its recommended solution, continuing the successful launch in Pizza Hut stores in the UK and Cyprus. These European markets join several other Pizza Hut jurisdictions that have chosen to embed the Algo Platform at the national level – Singapore, Canada and Australia.

Initial results from the Algo deployment in the first over 200 Pizza Hut UK stores have been very positive and underpins management’s confidence in securing further contract wins in other European Countries.

- END -

## **About Dragontail Systems**

Dragontail is revolutionising the Quick Service Restaurant (QSR) and foodservice industry with its Algo Platform and computer-vision QT quality system that uses artificial intelligence (AI) machine learning.

The Algo Platform uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery. It is the first system in the world to fully automate and streamline the kitchen flow to deliver an immediate and significant return on investment to fast food and quick service restaurants.

The QT system's sensor and camera automatically monitor the preparation and cooking process in the kitchen to improve the quality and consistency of meals. Using proprietary patented advanced AI machine-learning technology, the system keeps improving its diagnostics, becoming even more efficient.
